

The Industreweb Suite provides a uniquely comprehensive set of Tools that can be applied to a process, a single line, an entire plant or a complete global organisation.

Industreweb links your data collection system and allows the data to be presented in the most appropriate way for your organisation.

It combines the data available from Industreweb Collect and HMI units and allows the data to be presented on a browser so that it is available any time, anywhere and to the personnel that need it.

Industreweb helps improve skills, reach production targets, monitor plant performance and much, much more...

interoperability

The Industreweb Suite of software provides a complete set of tools and services for business improvement. It's advantage over other systems on the market is flexibility, scalability and low implementation costs.

Through open connectivity and a highly modular structure Industreweb brings disparate systems together. This results in a **smarter operation** using current data and avoiding the constant paper shuffle.

industreweb case studies

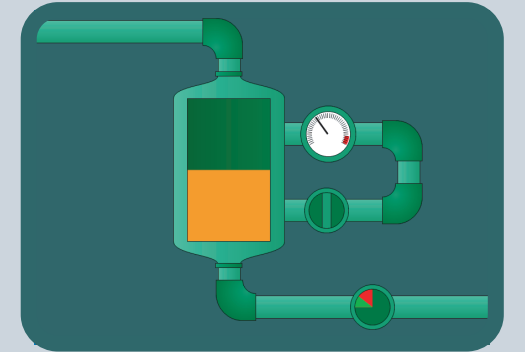

SWB Cymru Cyf

Petrochemical

Wales largest Bio Diesel Plant decided to use Industreweb as part of the automation system.

Industreweb provides plant-wide monitoring and the interface to the process control which is handled by the Siemens S7-300 PLC.

As the plant looks to expand its operations in the coming years, Industreweb will continue to grow with the process.

L'Oréal (Llantrisant)

Cosmetics

L'Oréal, global leader in the cosmetics market, is present in over 130 countries worldwide and has an annual turnover of some 14.5 billion euros (2004).

L'Oréal UK has 5 divisions. The Llantrisant factory produces hair care and hair styling products, which are distributed around the world.

Industreweb installed at the Llantrisant factory is used to read production data and errors from various machines using a mobile wireless link to the stations. This data is correlated and shows which faults cause the greatest loss of production. The installation saves engineering time and automates part of the commissioning process.

HI-LEX Cable System Co Ltd

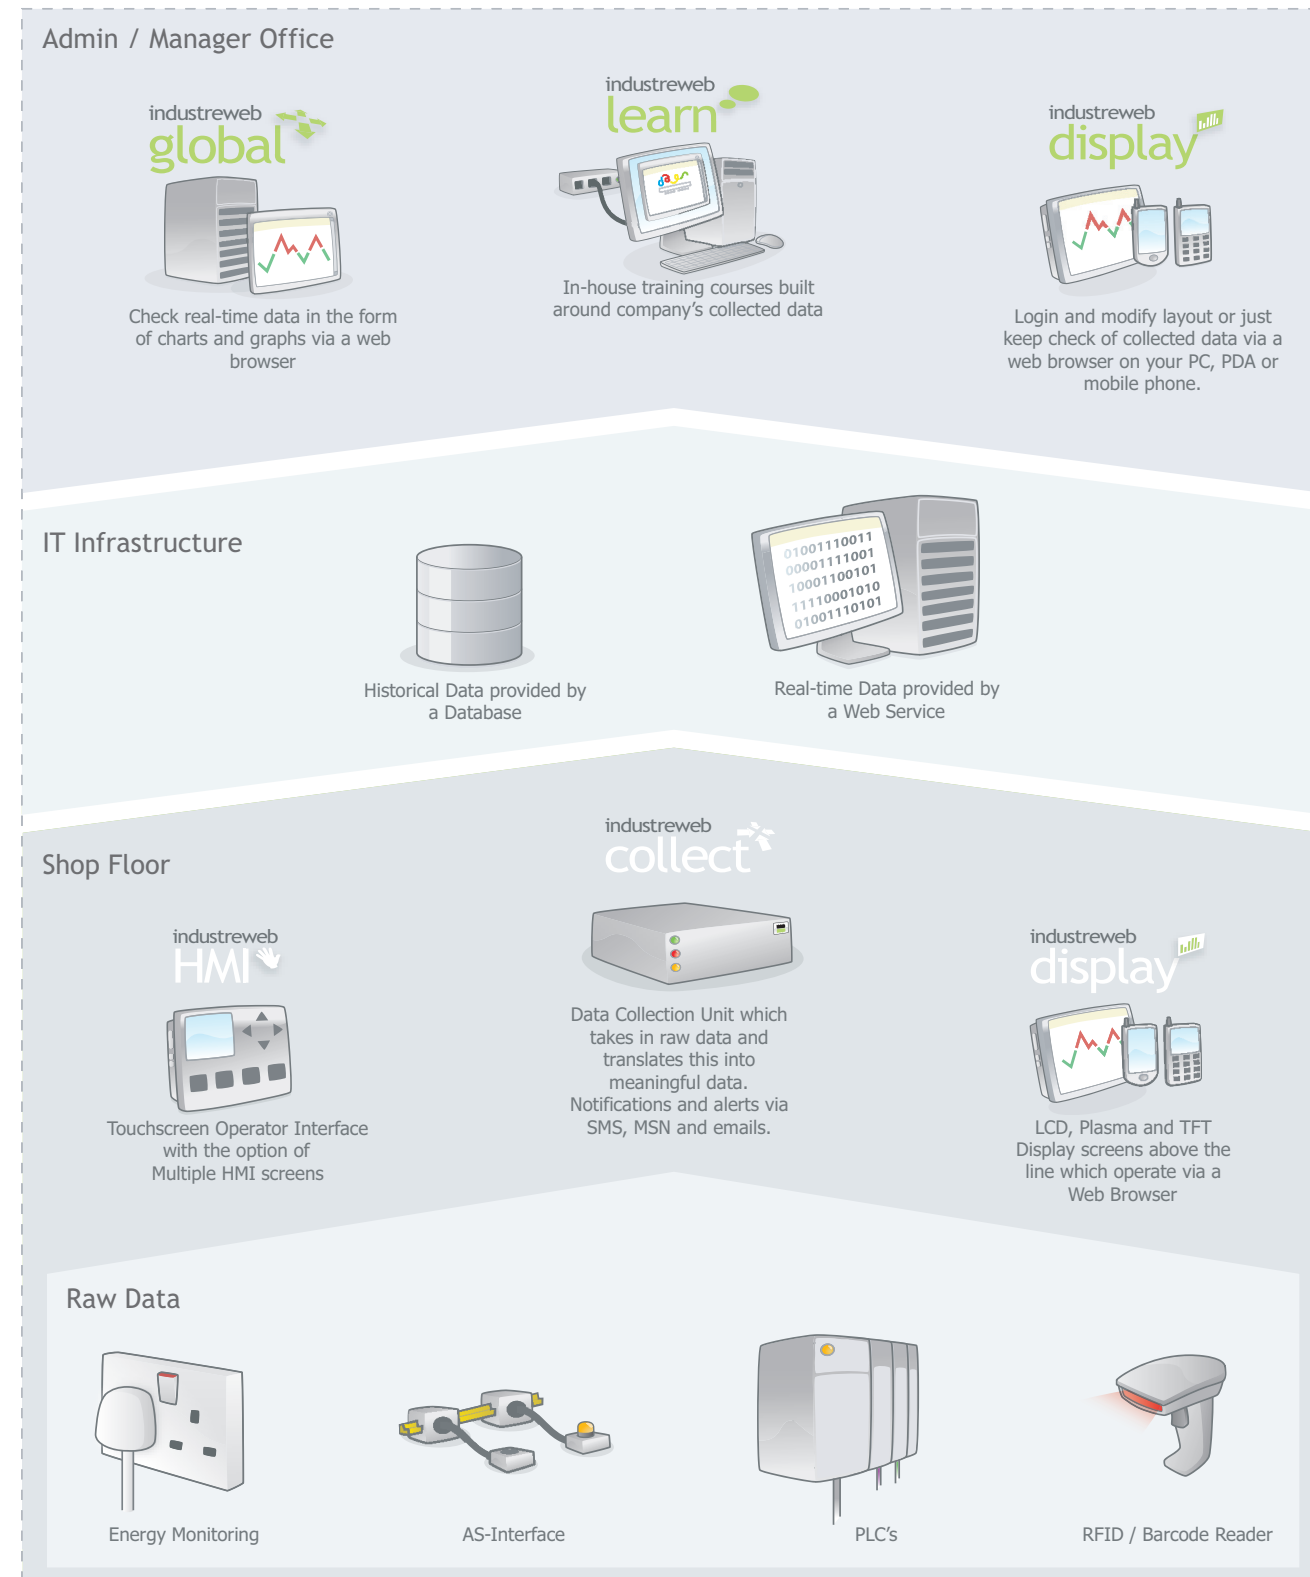

Automotive

HI-LEX is a leading supplier of innovative, high quality electromechanical devices and control cables for the Automotive sector. HI-LEX supplies major OEM's with effective, efficient solutions tailored to their needs.

Industreweb is used to verify the correct parts are being manufactured whilst providing operators a main link to the companies database. The results enable HI-LEX to increase quality and reduce waste.

industreweb applications

A central core of information collected from your business by some clever programming that enables Industreweb collect to connect to almost anything.

essential services

The key services that Industreweb delivers are as follows:

Energy Monitoring

With the rising costs of energy bills in both industrial and domestic environments, the reduction of waste and energy saving has never been more important.

Industreweb identifies this in real time while presenting the information to company personnel in clear, concise displays and easy to understand reports, all of which are tailored to the person who is reading it. Pinpoint exactly where you are wasting energy and throwing away money.

Supply-Chain Integration

Have the power and flexibility to monitor and keep track of goods throughout your processes from start to finish. Track every inch of your product in real time, anywhere in the world.

Industreweb tightens the supply-chain while giving customers options and information that you control. It cuts out misunderstandings and disappointment, leading to continued and improved business.

Error Proofing

Most Error Proofing systems rely on paper processes that can be time consuming, unsustainable and prone to inaccurate data.

Industreweb automates existing systems making them easier to maintain. It is uncomplicated, quick and fool-proof, ensuring what the operator is doing is right. Avoid costly mistakes with transparent information available instantly.

Process Improvement

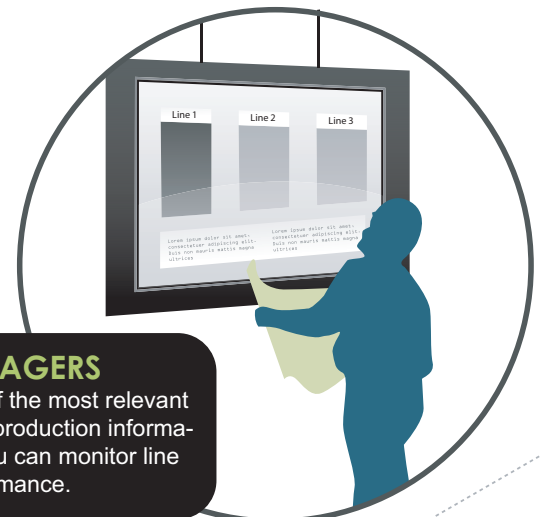

Improving performance is the fastest route to greater profits. Even minor tweaks can save money and speed up delivery.

Industreweb identifies and eliminates waste, in materials and time. View clear information targeting your problems and solve them with minimum effort.

ADMINISTRATORS
 Live data when you need it most. Create daily accurate reports to show efficiency and work flow.

LINE MANAGERS
 An overview of the most relevant and real-time production information means you can monitor line faults & performance.

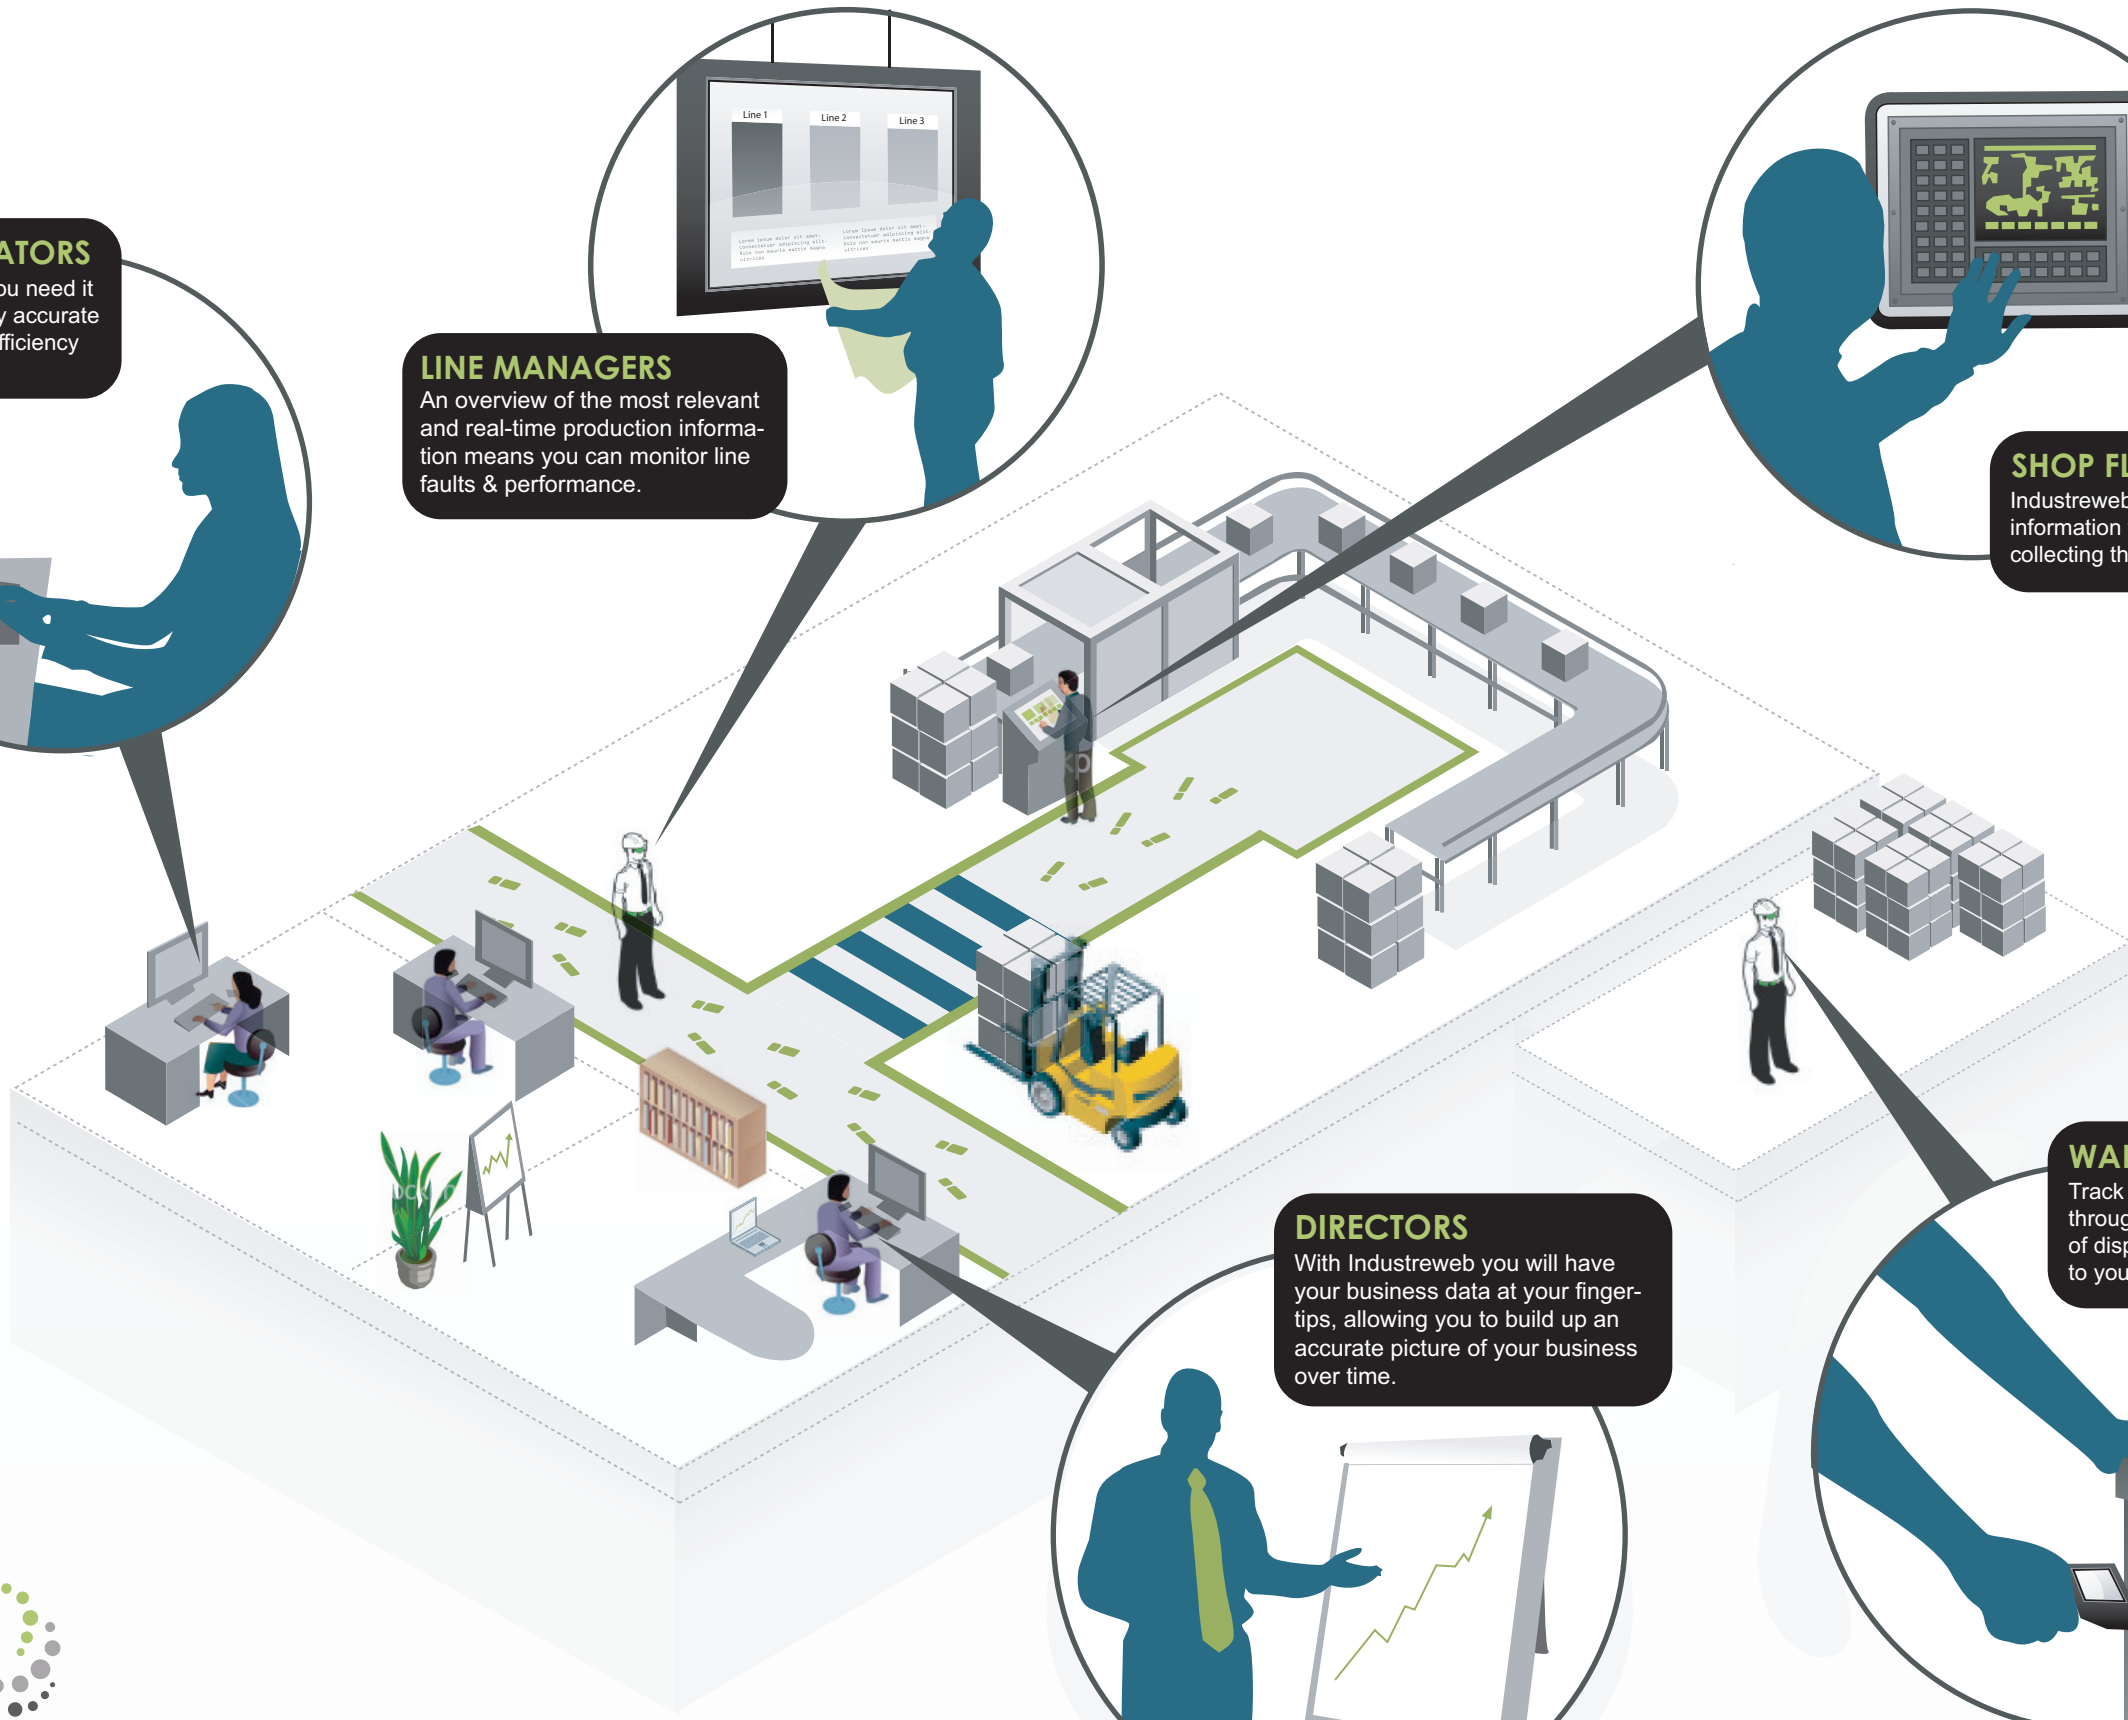

SHOP FLOOR ENGINEERS
 Industreweb delivers key process information to operators whilst collecting the valuable data they input.

WAREHOUSE STAFF
 Track inbound goods all the way through your process to the point of dispatch. All key data relating to your products is recorded.

DIRECTORS
 With Industreweb you will have your business data at your fingertips, allowing you to build up an accurate picture of your business over time.
